

## Solution Architecture

|                      |                                                                                    |
|----------------------|------------------------------------------------------------------------------------|
| <b>Date</b>          | 13 July 2026                                                                       |
| <b>Project Name</b>  | Cosmetic Insights : Navigating Cosmetics Trends and Consumer Insights with Tableau |
| <b>Maximum Marks</b> | 5 Marks                                                                            |

### Solution Architecture Diagram:

Provide a high-level visual representation of your solution's architecture. Use the structural layout below as a template to map out your Presentation Layer, Application Layer, and Data Layer. Fill in the specific technologies and components for your project directly into the boxes to create your architectural diagram.

## Component Description Table

| Component Name                     | Description / Role in Architecture                                                                                  | Technologies Used                |
|------------------------------------|---------------------------------------------------------------------------------------------------------------------|----------------------------------|
| Presentation Layer                 | Provides a user-friendly interface for viewing cosmetic dashboards, stories, reports, and interactive filters.      | HTML, CSS, JavaScript, Bootstrap |
| API Gateway                        | Receives user requests and routes them to the Flask application, which serves the Tableau dashboards.               | Flask                            |
| Application Layer (Business Logic) | Processes cosmetic data, handles dashboard integration, filtering, and user interactions before displaying results. | Python (Flask), Tableau Desktop  |
| Database / Data Layer              | Stores cosmetic product information used for analysis and visualization.                                            | CSV Dataset, Tableau Public      |
