

Coding & Solution

Date	13 July 2026
Project Name	Cosmetic Insights : Navigating Cosmetics Trends and Consumer Insights with Tableau
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	GitHub: https://github.com/babithaanguluri/Cosmetic-Insights-Navigating-Cosmetics-Trends-and-Consumer-Insights-with-Tableau Live Demo: https://cosmetics-insights.vercel.app/ Tableau Public: https://public.tableau.com/app/profile/babitha.esther.rani.anguluri/vizzes
Programming Language(s)	Python, HTML, CSS, JavaScript

Framework(s) Used	Flask, Bootstrap, Tableau
Key Features Implemented	• Interactive Tableau Dashboard • KPI Cards (Total Products, Brands, Average Price, Average Rating) • Product Analysis by Brand, Category, Price, and Rating • Skin Type Analysis (Dry, Oily, Combination, Normal, Sensitive) • Interactive Filters • Tableau Story • Responsive Web Interface • Tableau Public Integration • Vercel Deployment
Pending / Incomplete Features	• User Authentication • Admin Dashboard • Real-time Dataset Updates • Database Integration (MySQL/PostgreSQL)
Setup / Run Instructions	1. Clone the GitHub repository. 2. Install Python and Flask (pip install flask). 3. Open the project in VS Code or PyCharm. 4. Run the Flask application using python app.py. 5. Open the local server in a browser or access the deployed application through Vercel.

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:

- The project follows a modular architecture using **Flask**, **HTML**, **CSS**, and **JavaScript**.
- Interactive dashboards were developed using **Tableau Desktop** and published through **Tableau Public**.
- The web application is deployed on **Vercel**, providing easy online access.
- The codebase is organized for readability, maintainability, and future enhancements such as authentication, database support, and advanced analytics.
