

Demonstration on Video

Date	13 July 2026
Project Name	Cosmetic Insights: Navigating Cosmetics Trends and Consumer Insights with Tableau

Objective

The project demonstration video showcases the complete workflow of the Cosmetic Insights: Navigating Cosmetics Trends and Consumer Insights with Tableau project. It explains the problem statement, data preparation process, SQL analysis, Tableau dashboards, Flask web application, and the key insights obtained from the cosmetics sales and consumer dataset.

Video Demonstration Flow

1. Introduction to the project.
2. Overview of the electricity consumption dataset.
3. Microsoft SQL Server database setup and SQL queries.
4. Tableau dashboards and story explanation.
5. Flask web application demonstration.
6. Key findings and business insights.
7. Project conclusion and future enhancements.

Features Demonstrated

- Data import and preprocessing.
- SQL-based data analysis.
- Interactive Tableau dashboards.
- Tableau Story visualization.
- Flask web application.
- Responsive user interface.
- Consumer insights and business reports.

Expected Outcome

The demonstration video provides a clear understanding of the project implementation, highlights the analytical capabilities of the solution, and demonstrates how the application supports data-driven business decisions through interactive dashboards and consumer insights.
